

EyeLearn

CHILDREN'S VISION PROGRAM

EyeLearn is a children's vision program that focuses on outreach and education of key stakeholders regarding the importance of vision for learning, the value of a comprehensive eye examination, and modern children's vision needs including screen time recommendations.

Objectives:

- 1) Increase awareness/education of the impacts of remote or virtual learning on children's vision and what we can do in terms of prevention.
- 2) Information/education regarding the importance of healthy screen time habits and healthy environmental habits during COVID times.
- 3) Increase awareness of the importance of vision and how this impacts children's learning among teachers, allied health professionals and the public

Eligibility:

- All children ages 0-18 years who reside in BC are eligible
- No participation form is needed
- MSP will help contribute to either all or a portion of the examination cost depending on the clinic visited
